

## Fasteners clips and fasteners for ASHRAE rated filters

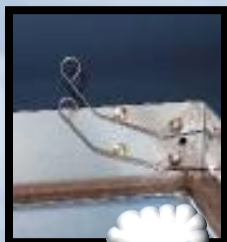

**Photo 1A:**  
2" pleated filter with C-70 fastener.

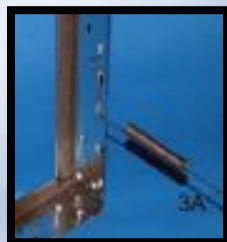

**Photo 2C:**  
C-70 positioning for header-type box filters.

**Photo 4A:**  
Externally supported retainer for front access HP. Built-in tab at each corner of the holding frame locks retainer in position (optional)

**Photo 1B:**  
C-70 fastener positioning lower for 1" deep filter, upper for 2" deep filter.

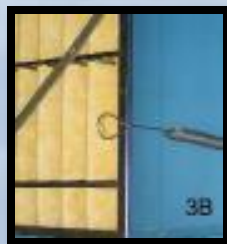

**Photo 3A:**  
C-80 positioning in Type 8 frame.

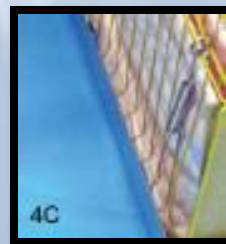

**Photo 4B:**  
C-71-12 fastener positioning.

**Photo 1C:**  
C-86 fastener for 4" deep filter in Type 8 frame.

**Photo 3B:**  
C-80 positioning on Riga-Flo.

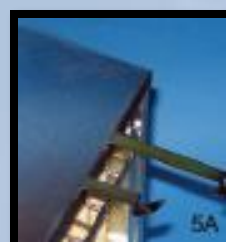

**Photo 4C:** C-71-12 fastener with retainer in position. Small loop is positioned over between outside double bar of frame.

**Photo 1D:**  
C-86 fastener positioning

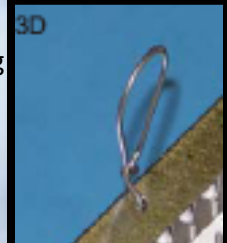

**Photo 3C:**  
C-80 positioning on Aeropac.

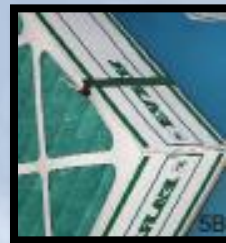

**Photo 5A:**  
C-79-1 and C-79-2 fastener positioning for 2" deep and 4" deep pleated filters (respectively).

**Photo 2A:**  
C-70 positioning for Hi-Flo or other pocket style filters.

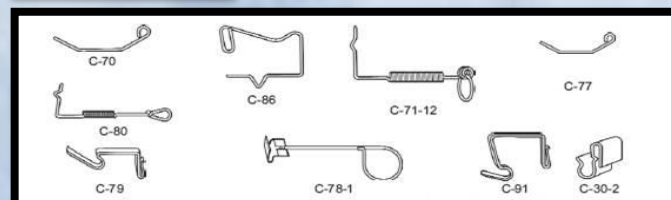

**Photo 3D:**  
Rigo-Flow and Aeropac filters have pilot holes for C-80 attachment.

**Photo 5B:**  
C-79-2 fastener with Riga-Flo and 4" deep 30/30.

**Photo 2B:**  
C-70 positioning for HP Frame assembly.

Just a few of the fasteners available.
