

Hi-Flo[®] Appendix J MERV 13,14 -A

High efficiency ASHRAE grade filtration to address today's indoor air quality problems. *guarantees a consistent and reliable sub-micron particle capture throughout its lifetime*

- The Hi-Flo can remove contaminants such as fumes, smoke, bacteria, fungi and virus-bearing droplet nuclei. The Hi-Flo is the filter of choice for the removal of nuisance contaminants such as pollens, paper dust and other atmospheric impurities.
- Particle capture performance and filter configuration are unaffected by dust loading and/or humidity
- Controlled media spacing to minimize pocket-to-pocket contact, ensures uniform airflow and full utilization of the media area
- Optimized design of the pocket stitching
- Hi-Flo is made with a rigid steel frame

These features result in the lowest life cycle product cost for your facility.
