

# Meyer Global Filter, Inc

## Opti-pac<sup>®</sup>

High efficiency ASHRAE filtration in a compact, energy efficient, package.

*Compact, Space Saving 4"  
Deep High Efficiency  
ASHRAE Grade Filters.*

- Is available in the following efficiencies: MERV11, MERV 13 or MERV 14 per ASHRAE Standard 52.2-1999.
- Incorporates a wet-laid micro fine glass media (up to 133 square feet) in a close-pleat™ design for optimum airflow, low system air resistance, and extended service life.
- Includes media spaced and supported with thermoplastic resin separators assuring full use of media area and uniform airflow through the filter.
- Media bonded to the periphery of the enclosing frame, using a fire retardant polyurethane sealant, eliminating the possibility of air-bypass.
- Has an enclosing frame constructed of 24-gauge galvanized steel assuring rigidity during operation and reducing the possibility of damage during handling.
- Is available in multiple, full size configurations.
- Includes an integrity guarantee to 10" W.G.
